Senior Platform Engineer | Java | DevOps | Infrastructure as Code | Kubernetes | AWS

SUMMARY

Senior Platform Engineer with 15+ years in software engineering: over a decade as a Java developer building backend services and microservices with Spring, followed by 7 years in DevOps, cloud infrastructure and platform engineering. Built multi-cloud infrastructure (AWS, Azure, GCP) from scratch entirely as code with Terraform and helped launch a managed Apache Flink SaaS product. Ran 24/7 Kubernetes platforms on AWS serving millions of concurrent IoT device connections. My deep Java background means I understand the applications running on the platforms I build, not just the infrastructure.

TECHNICAL SKILLS

- **Languages:** Java (expert), Go, Python, JavaScript
- **Java Ecosystem:** Spring (Boot, WebFlux, Cloud, Security, Data), RxJava, Java EE, Jersey, Jetty, OSGi, Maven, Gradle
- **Infrastructure as Code:** Terraform, Terraform Cloud, GitOps with ArgoCD
- **DevOps & CI/CD:** Jenkins, GitHub Actions, ArgoCD, Docker, Prometheus, Grafana, 24/7 operations
- **Cloud & Containers:** AWS, Azure, GCP, Kubernetes (EKS)
- **Frontend & Messaging:** React, Angular, Kafka, AMQP, MQTT

EXPERIENCE

- **Alibaba Cloud Intelligence Group (Ververica)** Munich, Germany (remote)
Senior Platform Engineer Feb 2023 – Present
 - Designed and built the cloud infrastructure for the Ververica Cloud platform from scratch across AWS, Azure and GCP, fully managed as code with Terraform and Terraform Cloud.
 - Played a key role in launching a managed Apache Flink service as a SaaS product, including design of the AWS infrastructure and services behind it.
 - Set up and operated EKS Kubernetes clusters for high availability, scalability and security.
 - Built CI/CD pipelines with Jenkins, GitHub Actions and ArgoCD (GitOps); introduced monitoring and alerting with Prometheus and Grafana.
 - Enforced cloud security best practices across environments; mentored junior engineers and worked closely with product development teams.
- **Bosch.IO** Waiblingen, Germany
Senior DevOps Engineer Feb 2019 – Feb 2023
Bosch IoT Hub (Bosch IoT Suite)
 - Kept the Kubernetes-based IoT Hub on AWS highly available and secure around the clock, scaling it to millions of concurrent IoT device connections.
 - Brought Eclipse Hono (Java) into commercial production use and extended its Java-based protocol adapters (MQTT, AMQP, CoAP, HTTP, WebSocket, LwM2M).
 - Improved the scalability and security of the microservice architecture; operated multi-node Kubernetes clusters, including network tuning.
 - Maintained the AMQP messaging service; contributed to bug fixes and system testing.
- **HSE24 Home Shopping Europe GmbH** Ismaning, Germany
Full Stack Java Developer Apr 2018 – Jan 2019
 - Integrated a new payment provider to make the online shop PCI compliant.
 - Extended the legacy and new web shops end to end for additional countries (Java, Spring, OSGi, Karaf, JavaScript).
- **MediaMarktSaturn** Munich, Germany
Full Stack Developer Sep 2017 – Apr 2018
 - Helped break the monolithic IBM WebSphere Commerce shop into high-availability microservices, building the new checkout services for the multichannel web shop.
 - Stack: Java (streams, RxJava), Spring (Boot, WebFlux, Cloud, Security), React with server-side rendering, Node.js, Docker, Rancher, Consul, Vault, OpenAPI.
- **European Computer Telecoms AG** Munich, Germany
Software Engineer Dec 2011 – Aug 2017

- Built the company's next-generation enterprise call center product with real-time communication and telephony integration (Java, Spring, CometD, Jetty; WebRTC, AngularJS, React).
- Developed the browser-based Service Creation Environment that lets customers build voice, SMS and e-mail workflows without telecom expertise; worked across frontend (GWT, JavaScript) and backend (Java, Jersey, REST API design, Spring Data).
- Advised the team on continuous integration practices.

- **Cycos AG** Alsdorf, Germany
Junior Software Developer *May 2011 – Oct 2011*
 - Modernized the web frontend of the Siemens OpenScape Web Client; implemented features and bug fixes (Java, jQuery, XML/XSL, AJAX).
- **Ericsson Eurolab** Aachen, Germany
Student Researcher *Apr 2010 – Apr 2011*
 - Research on a Service Creation Environment for community services combining Web 2.0, SIP/IMS communication services and social networks (Java, EJB, AspectJ, GWT).
- **Motorola** Dhaka, Bangladesh
NOC Engineer (Software Development) *Jun 2007 – Aug 2009*
 - Developed a unified monitoring application for telecom network management (Java EE, AJAX, web services, Google Maps API).

EDUCATION

- **RWTH Aachen University** Aachen, Germany
M.Sc. studies in Software Systems Engineering (not completed) *Jan 2010 – Apr 2011*
 - Distributed Systems, Middleware, Peer-to-Peer Systems, Computer Networks, Functional and Logic Programming, Object-Oriented Software Construction.
- **Military Institute of Science and Technology (MIST)** Dhaka, Bangladesh
B.Sc. in Computer Science and Engineering *Feb 2002 – Feb 2006*

CERTIFICATIONS

- **Data Streaming Engineer – Apache Flink®**: Confluent, Sep 2026 (valid until Oct 2027)
- **Ververica Bootcamp Program**: Ververica, May 2025

LANGUAGES

English (fluent) | German (B2–C1, professional working proficiency)
